The cost of security is getting to be a crime

For the firm or building with a snug budget, the ballooning cost of security service may seem like highway robbery. Six low-cost ways Detex can help:

1. Locksets to lock doors electrically.
2. Exit control locks to secure emergency exits.
3. Alarms that make a fuss about unauthorized door usage.
4. Dentco Access Units using cards, push-buttons or both.
5. Remote Indicating Panels that monitor up to 50 doors at once.
6. Our new Detex Security Catalog. We've saved you a free copy.

free: a product usage poster that helps save lives.

"... he was using a top-quality belt/lanyard system, but the belt was on backwards. Even a short fall could have broken his back!"

Alarming, but true. Even the best fall prevention/protection equipment can be safe only if it is used properly!

That's why Rose offers you this large 17" × 22" PRODUCT USAGE POSTER as an "on-site" guide to help your workers minimize improper-use hazards. Its vitally important recommendations are based on over 45 years of research, development and use in the field.

Use your fall protection equipment properly. Write for your FREE poster today!
